

Harnessing energy

The power of us.

GEMINI IS A DIFFERENT KIND OF COMPANY. Harnessing energy since 1982, Gemini has built its reputation on a steadfast commitment to understanding our client's businesses, providing superior customer service and delivering value. We've established a collaborative environment to foster the free flow of ideas. This means we can execute multi-discipline engineering solutions and field solutions to a broadening base of energy, environmental and industrial clients.

Gemini takes pride in having strong technical capabilities and a proven track record. Our projects range from complete EPC for greenfield facilities to re-vamps, de-bottlenecks overhauls and upgrades on existing facilities.

The power of us.

GEMINI HAS THE POWER TO MEET YOUR NEEDS. Engineering, procurement and construction management (EPCM) services, if coupled with our field services of fabrication, construction and maintenance provides an integrated service that is the source of our strength. Our integrated and flexible approach uniquely positions us as one of the few companies capable of providing fully comprehensive and cost-effective project solutions.

LET US TAKE ON YOUR TOUGHEST CHALLENGES. Whether you need us for a stand-alone or an integrated solution, we have the unique ability to power your project the way that best suits your business. We pay attention to the details your project demands, utilize current technology and deliver tailored, cost-efficient solutions that minimize your capital expenditure.

Real Capability

With a wide range of capabilities and experience, Gemini will achieve your project expectations. Our services include:

ENGINEERED SOLUTIONS

- Multidiscipline EPC projects;
- Fast-track EPCM and turn-key projects;
- Innovative renewable energy; and
- Waste management and environmentally sound engineering services

INTEGRATED SOLUTIONS

- Project Management
- Construction
- Fabrication
- EIC
- Field Engineering

MAINTENANCE SOLUTIONS

- Project Management
- Routine Maintenance
- Shut Downs
- Turnarounds
- Sustaining Projects

“The combined strengths of Gemini’s engineering and field service capabilities represented real strength to us. Their integrated solutions increased project efficiency and accountability, both of which are important to us and the success of our projects.”

Think Twice

Safety and quality are core values at Gemini and a fundamental part of every project. Our Think Twice safety program stresses that every incident is preventable and our goal is to achieve and maintain **A ZERO RATING**. To meet our stringent safety expectations, our employees and supervisors undergo industry recognized safety training that is reviewed on a regular basis.

Our strong commitment to quality is reflected in our program, which is designed to promote client satisfaction while eliminating re-work through:

- Understanding our client’s goals and priorities;
- Clearly defined project control procedures;
- Continuous improvement through ongoing innovation; and
- Leveraging technology and expertise to our advantage

Project Development

Gemini has experience in all phases of project development to achieve your expectations:

- Multi-discipline EPC projects for energy producers and industrial clients;
- Fast track EPCM projects to support established and emerging energy producers; and
- Innovative renewable energy, waste management and environmental engineering solutions

Whether your project involves a tie-in or a more comprehensive solution, we can handle construction, electrical and instrumentation, fabrication and maintenance services in the following market sectors:

- Oil and Gas Facilities (Conventional, Heavy Oil In-situ), Pumping stations, Mainline Boost or Stations, CO2 injection);
- Heavy Industrial;
- Renewable Energy; and
- Co-Gen Plants.

*“Gemini’s solution was both realistic and reasonable.
Their team really knows how to work a project through.”*
